Face Recognition for Real Time Application (Paperback)

By Pradeep Kakkar

GRIN Publishing, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Master s Thesis from the year 2017 in the subject Engineering - Computer Engineering, grade: 10, course: M.Tech-ECE, language: English, abstract: Images containing faces are essential to intelligent vision-based human computer interaction, and research efforts in face processing include face recognition, face tracking, pose estimation, and expression recognition. The rapidly expanding research in face processing is based on the premise that information about a user s identity, state, and intent can be extracted from images and that computers can then react accordingly, e.g., by knowing person s identity, person may be authenticated to utilize a particular service or not. A first step of any face processing system is registering the locations in images where faces are present. The local binary pattern is a simple yet very efficient texture operator which labels the pixels of an image by thresholding the neighborhood of each pixel and considers the result as a binary number. The LBP method can be seen as a unifying approach to the traditionally divergent statistical and structural models of texture analysis. Perhaps the most important property of the LBP operator in real-world applications...
